Hands-on engineering leader and former founder with **10+ years of experience** across fintech platforms, applied AI and enterprise software. Combines architecture and product delivery with hiring and team building. Led a **25-person engineering team** for HDFC MyCards and oversaw engineering through completion of the platform's **RBI audit**. Experience spans digital lending, ML-based fraud detection, recommendations and conversational AI.

PROFESSIONAL EXPERIENCE

Reward360 Global Services Pvt. Ltd.

Staff Engineer 2022 - Present

Fintech platforms and engineering leadership

- Owned architecture and delivery of **HDFC MyCards**, a card management platform serving **6M+ monthly active users and 16M+ registered cards**; designed distributed microservices for high-volume banking workloads.
- Led HDFC MyCards engineering through completion of the platform's **Reserve Bank of India (RBI) audit**.
- Directed a **25-person cross-functional team** across backend, frontend, QA and DevOps; set technical direction, allocated work and coordinated delivery across engineering disciplines.
- Architected the **Apple India and TVS Credit instant financing integration**, enabling real-time loan eligibility, credit orchestration and approval workflows during Apple purchases.
- Optimized APIs and database queries to improve platform performance and reliability while supporting secure fintech integrations.

Applied AI and automation

- Developed a **location-based suggestion engine for HDFC SmartBuy** to support personalized recommendations and discovery.
- Led AI-driven engineering productivity initiatives, automating internal workflows to support engineering delivery.

VIKRAM ADITYA

ENTREPRENEURSHIP AND EARLIER EXPERIENCE

Surdtech Pvt. Ltd.

Founder and Head of Technology 2017 - 2022

- Founded and led a technology services company, owning **hiring, team building, architecture and enterprise delivery** from initial requirements through production deployment.
- Assigned project ownership and coordinated resources across client engagements while remaining hands-on with system design, DevOps pipelines and production deployments.
- Designed and deployed **chatbots for international airline clients** and built a crew coordination platform for **JetBlue**, including automatic flight-based group creation and real-time messaging.
- Implemented **demand forecasting with Prophet** to support planning and resource allocation.
- Built and deployed a municipal ERP platform for land and property tax management, owning system architecture and infrastructure strategy. 2017 - 2019
- Built an ERP platform for **Tea Board India**, covering production and sales tracking, stakeholder dashboards, reporting and four Android applications.
- Developed a **voice-enabled concierge using Amazon Transcribe** and delivered multi-tenant e-commerce platforms for enterprise clients.

Software AG

Software Engineer and Consultant 2016 - 2017

- Developed Java and Selenium test automation, an AngularJS test repository interface and Jenkins CI integration; researched **ML and NLP for automated test generation**.

ShopClues

Analyst 2012 - 2013

- Built an **NLP-based email sentiment analysis system** to identify customer frustration and support prioritization; optimized logistics processes and service operations.

CORE EXPERTISE

AI and ML: Fraud detection, recommendation systems, NLP and sentiment analysis, conversational systems, time-series forecasting, AWS SageMaker, Prophet, Amazon Transcribe.

Fintech and leadership: Card platforms, digital lending, loan eligibility and credit orchestration, RBI audit experience, team building, hiring, technical strategy, stakeholder and delivery management.

Engineering: Java, Spring Boot, TypeScript, JavaScript, React, Next.js, REST APIs, microservices, distributed systems, SQL, MongoDB, AWS, Docker, Kubernetes and CI/CD.

EDUCATION

MCA, Tezpur University, 2016
